

Terrestrial Ecology

COOE delivers quality terrestrial flora, fauna and habitat studies for small to large-scale projects across a range of industries. COOE plans and undertakes baseline and ongoing monitoring programs, delivers detailed species inventories and addresses species and habitat management requirements. Our scientists analyse data within current legislation and provide cost effective planning and management strategies.

Our Services

- Flora and fauna desktop and field studies, including:
 - * Ecological surveys
 - * Threatened species assessments
 - * Vegetation classification and mapping
 - * Roadside flora assessments
 - * Rehabilitation monitoring
- Expertise in ecology, botany, ornithology, herpetology, mammalogy, zoology and entomology
- Flora and fauna impact assessments and management plans
- Stakeholder consultation
- Ecosystem Function Analysis
- Vegetation offset assessments and significant environmental benefit calculations
- Elliott, pitfall, funnel, cage and harp trapping, AnaBat detection, camera traps and spotlighting
- Licensing for animal ethics and scientific research permits
- Sub-contracting

Accredited Consultants

The COOE team includes Accredited Consultants endorsed by the Native Vegetation Council.

Industries

COOE's experienced personnel implement ecological studies to suit projects of many types and sizes, including mining, quarrying, energy, infrastructure development, agriculture and government.

Regions

COOE conducts ecological studies across all regions of Australia. Project teams are selected to match skills and experience with project requirements.

COOE Pty Ltd ABN 65 147 909 451
